

Seminar gruppe 2 (117)

Oliver Ekeberg

Contents

1	Introduction	1
2	Critical Discussion	1
3	Conclusion	1

1 Introduction

Tobakksreklamer bør forbys fordi de er medvirkende til at unge begynner å røyke. Og selvom tobakksreklamer ikke hadde hatt en slik effekt, burde de fortsatt forbys fordi de gjør at folk som allerede røyker, får feil inntrykk av at røyking er akseptabelt.

2 Critical Discussion

This is where you present your original contribution—your critique, analysis, or positive view.

Objection: *However, one might object that the first premise is false. What if genetic engineering allows some humans to become immortal? This would undermine the entire argument.*

Reply: *In reply to this objection, we can modify the first premise to be All biologically natural men are mortal. This accommodates the objector's point without surrendering the argument's validity.*

You can also use footnotes for tangential but interesting points.¹

3 Conclusion

Briefly summarize the path your paper has taken and restate your conclusion. Avoid introducing new arguments or evidence here.

¹This is a great place to mention an interesting aside, a further reference, or a complicating point that would break the flow of the main argument.
